Amherst 01003

Office of the Secretary

October 16, 1968

Mrs. Janet Goguen Jewett
Station Manager WMUA
Engineering Building

Dear Mrs. Jewett:

I have your letter of October 7 in which you inquire about the procedure for moving the WMUA antenna from its present location to the roof of one of the Orchard Hill dormitories. We also have in hand the FCC Form 340s which you provided.

My quick reaction was that this matter might come before the Board of Trustees at their meeting of October 26. However, on further assessment, it appears essential that you contact our Director of Physical Plant, Mr. Harry Hugill, so that the precise location at Orchard Hill can be determined; also, that the appropriate evaluation can be made of the stresses which may occur to the building structure at Orchard Hill by the addition of an antenna system. Mr. Hugill will advise the Treasurer's Office and my own concerning the feasibility of the proposed relocation after which -- presuming that the report is favorable -- we shall be in a position to request clearance by the Buildings and Grounds Committee of the Board of Trustees and also from the University Building Authority.

I shall retain the material which you sent to me so that we can proceed from here at the earliest possible moment, after the aforementioned clearances have been obtained.

With every good wish.

Sincerely,

RJM

Robert J. McCartney
Secretary of the University
